C9300X-12Y-E Description

The Cisco Catalyst C9300X-12Y-E is a high-density, data-only fiber access switch designed for campus and data-center edge deployments requiring ultra-high throughput and flexible uplink configurations. It features 12 SFP28 fiber ports that support multi-rate operation at 25 Gbps, 10 Gbps, or 1 Gbps, enabling seamless migration to higher-speed optics as network demands grow. Uplink connectivity is modular: customers can choose from any combination of C9300X network modules—such as 8×25 G/10 G/1 G SFP (NM-8Y), 2×100 G/40 G QSFP (NM-2C), or 4×100 G/40 G QSFP (NM-4C)—to architect optimal aggregation or core layer connectivity without forklift upgrades.
